---

## PERSONAL PROJECTS:

### Bulk Image downloader

Live Site: <https://bulk-downloader.netlify.app>

Github: <https://github.com/Daviddix/bulk-image-downloader>

- Designed, built and deployed a web application that eases the stress of downloading images in bulk with potentials to:
- Reduce clicks needed for download and time spent sorting by 90%
- Help offline designers save their data and time

### Reminder

Live Site: <https://remindr-webapp.netlify.app>

Github: <https://github.com/Daviddix/Remindr-webapp>

- Designed, built and deployed a web application meant for taking the mental load off web application users by reminding them of specific tasks at a given interval. It also;
- Reduced memory juggling of users

### IP Address tracker

Live Site: <https://ip-trackrr.netlify.app>

Github: <https://github.com/Daviddix/IP-tracker>

- Built and deployed a web application that tracks the Ip address of the user, any domain given or any website given
- Implemented the use of Geofly and leaflet APIs

---
